About This Release

The latest version of this release is: 22.0-SNAPSHOT.

You can see the [detailed change log](#) on GitHub.

Coming from an older Scout version? Check out the [Migration Guide](#) for instructions on how to obtain the new version and upgrade existing applications.

Service Releases

Scout 22.0 will continue to be maintained for a while and new builds may be released from time to time. Beside bug fixes, these releases may even contain some minor features.

Demo Applications

The demo applications for this version can be found on the [features/version/22.0-SNAPSHOT](#) branch of our docs repository on GitHub.

If you just want to play around with them without looking at the source code, you can always use the deployed versions:

- <https://scout.bsi-software.com/contacts/>
- <https://scout.bsi-software.com/widgets/>
- <https://scout.bsi-software.com/jswidgets/>

Native Notification Support

It's now possible to send notifications via the Notification API. The DesktopNotification has two new properties to control the behavior: nativeOnly and nativeNotificationVisibility.
