About This Release

The latest version of this release is: 23.2.0.

You can see the [detailed change log](#) on GitHub.

Coming from an older Scout version? Check out the [Migration Guide](#) for instructions on how to obtain the new version and upgrade existing applications.

The here described functionality has not yet been released and is part of an upcoming release.

Demo Applications

The demo applications for this version can be found on the [features/version/23.2.0](#) branch of our docs repository on GitHub.

If you just want to play around with them without looking at the source code, you can always use the deployed versions:

- <https://scout.bsi-software.com/contacts/>
- <https://scout.bsi-software.com/widgets/>
- <https://scout.bsi-software.com/jswidgets/>

Improved Developer Experience for Scout JS

Scout 23.2 contains many improvements for Scout JS developers. The goal was to make the development easier, more efficient and more fun. Please read the following chapters to learn how we did it.

MenuTypes

Default menuTypes

Default menuTypes have been added to several widgets. This means that e.g. the `Table` treats a menu without a menuType as if it had set `Table.MenuTypes.EmptySpace`. For more information about the default menuTypes see [Technical Guide for Scout JS](#).

Do you want to improve this document? Have a look at the [sources](#) on GitHub.
